## Rail Fault Plotting System

**Proven Fault Plotting System** using highly accurate GPS location. Touchtech RailTrack system provides a means of tracking location of faults across railway networks using highly accurate GPS and GIS data layering

## BENEFITS

- ✓ Rail Track will interface at high speed with the client database of previously collected data and produce a plot on maps of location of faults
- ✓ Allows for improved tracking and management of faults across train lines
- ✓ Recording detailed data on faults allows for faster response on maintenance and therefore reduced downtime of rail systems
- ✓ The system is fully customised for the client requirements

## FEATURES

- ✓ Highly accurate specialised differential GPS satellite mapping
- ✓ Produces data that is transferred to a USB drive that can be used on any tablet there by allowing maintenance teams to locate the faults easily using GIS maps etc. on the tablet
